

Session Program

28-30 Nov 2016

Neutrino Frontier Workshop 2016

Session9

Wednesday 30 November

13:00

Session9

Session |

Location: Yamashiro Spa Yunokuni Tensho, Kaga, Ishikawa, JAPAN |

Convener: Masashi Yokoyama

13:00-13:15

C03:Thermal relic dark matter beyond the unitarity limit

Speaker

Masahiro Ibe

13:15-13:35

Research of a new TOF method for neutrino-less double beta decay search

Speaker

Kodai Matsuoka

13:35-13:55

The CANDLES project aiming for the low background frontier

Speaker

Takashi Iida

13:55-14:15

Experimental efforts toward neutrino mass measurements by using CMB polarization

Speaker

Osamu TAJIMA

14:15-14:35

Testing neutrino mass generation mechanisms from the lepton flavor violating decay of the Higgs boson

Speaker

Mayumi Aoki

14:35-14:40

Closeing remarks

Speaker

Masahiro Kuze

15:00
