Simplifying Moodle Course Creation with the mebis Design Plugin: Beautiful and Accessible Courses in Minutes

Saturday 1 March 2025 09:05 (30 minutes)

Creating structured, visually appealing, and accessible Moodle courses can be a daunting task for educators. This presentation introduces the innovative Tiny plugin developed by the mebis learning platform team, which revolutionizes course design by providing pre-designed design boxes integrated with avatars, work modes, and more. With this plugin, educators can effortlessly create stunning and barrier-free courses in just a few clicks. The intuitive interface allows users to insert preformatted boxes—such as tips, feedback, tasks, and scenarios—directly into their courses, ensuring clarity and structure from the start. These tools not only save time but also empower every educator, regardless of technical expertise, to design professional and engaging courses that are accessible to all learners. This session will provide a hands-on demonstration of the plugin's features and explore how it fosters creativity while maintaining accessibility and efficiency. Attendees will leave inspired and equipped to create structured, inclusive, and visually appealing Moodle courses with ease.
