Study of eta-meson decays at KLOE/KLOE-2

Tuesday 27 November 2018 16:25 (25 minutes)

The latest results obtained by the KLOE experiment at DAFNE, the phi-factory collider in operation at the Laboratori Nazionali di Frascati of INFN, on the the Dalitz plot analysis of the $\eta \rightarrow \pi^+ \pi^- \pi^0$ decay and searches for two pion decays will be presented, together with the status and prospects for the analysis of KLOE-2 data.

Content of the contribution

Experiment

Author: KLOE-2 COLLABORATION, on behalf of the

Presenter: KANG, xiaolin (LNF)

Session Classification: Emergence of symmetries from entanglement

Track Classification: [1] T, C, P, CP and CPT symmetries
