Recent Higgs boson analysis results

Thursday 1 September 2022 14:00 (30 minutes)

The latest results on the Higgs boson properties from the ATLAS and CMS experiments will be reviewed, 10 years after its discovery and with 30 times larger statistics.

Searches of Higgs boson pair production will be presented.

In addition a few projections for the end of the high luminosity operation of the LHC will be shown.

Scientific topic

Fundamental interactions

Author: MARIOTTI, Chiara (INFN Torino (IT))

Presenter: MARIOTTI, Chiara (INFN Torino (IT))

Session Classification: Fundamental interactions
