

Giving BCLC a Structure

Where to go from here?

TOPICS TO DISCUSS

Putting the Word Work into Workshop

1. BCLC organization
2. COMMUNICATION
3. future meetings
4. AOB

BCLC Structure

Motivation

1. The number of participants yesterday and today shows the **interest** of the Brazilian HEP community in LC physics.
2. However, probably **everyone** is involved in other projects.
3. How do we **keep the ball rolling** from here on?
4. It would be a pity if we lost momentum after this workshop.
5. How do we organize ourselves?
 - **no subgroups**
 - **decentralized** **boundary conditions**
 - **collaborating** not competing with existing projects

BCLC Structure

proposal - up for discussion

1. have **point persons** that act as **liaison/observer**
 - ILC
 - analysis/software
 - instrumentation
 - theory/phenomenology/software
 - outreach/STEM
2. continue **monthly meetings** with invited (ILC) speakers
3. Encourage **small ILC projects** for scientific initiation or PhD chapters.
4. emphasize **publication possibilities**
5. AS **local activities** pick up, add reports about those to the meetings.

minimize person power

keep eyes on the ball

cultivate ILC interest

feedback loop

The real work
only begins now!
