

# Leptogenesis in unified models

*Thursday 3 October 2024 12:00 (30 minutes)*

We shall briefly review the motivation for considering thermal leptogenesis within unified models and comment on the prospects of accommodating the measured value of the baryon-to-antibaryon asymmetry of the Universe in minimal calculable scenarios of the  $SU(5) \times U(1)$  and  $SO(10)$  type.

**Presenter:** MALINSKY, Michal
