

Leptogenesis in unified models

Thursday 3 October 2024 12:00 (30 minutes)

We shall briefly review the motivation for considering thermal leptogenesis within unified models and comment on the prospects of accommodating the measured value of the baryon-to-antibaryon asymmetry of the Universe in minimal calculable scenarios of the $SU(5) \times U(1)$ and $SO(10)$ type.

Presenter: MALINSKY, Michal
