

Dark matter with GAMBIT

Friday 9 December 2022 11:30 (30 minutes)

I give an update on results for dark matter obtained using GAMBIT, the Global And Modular BSM Inference Tool. After briefly describing the main features of the GAMBIT code, I highlight why GAMBIT is a promising framework to isolate sign of physics beyond the standard models (BSM) of particle physics and cosmology. Then I show the latest GAMBIT results for various models containing a dark matter candidate.
