

Mapping Mass and Motion in the Local Universe with 4HS

Monday 3 February 2025 08:50 (30 minutes)

I will give a brief overview of the 4MOST Hemisphere Survey (4HS), with particular emphasis on our cosmology science goals of mapping mass and motion on \sim Gpc scales, and highlighting several key aspects of the 4HS experimental design relative to past and current surveys.

Presenter: TAYLOR, Edward (Swinburne University of Technology)

Session Classification: Session 1
