

Session Program

5 January 2021 to 5 March 2021

HIM archive 2004-10 - 2022-08

HIM2007@Yonsei (2007-04)

Thursday 7 January

10:00

HIM2007@Yonsei (2007-04)

Session

10:00-10:20

Physics Opportunities with heavy quark system at FAIR, Su Houn Lee (Yonsei Univ.)

10:20-10:40

A Brief Introduction to the Heavy Ion Meeting in Korea, In-Kwon Yoo (Pusan National Univ.)

10:40-11:00

Theoretical Aspects of the Color Glass Condensate and Glasma, L. McLerran (BNL)

11:00-11:20

Anaylsis of Low Energy Pion Spectra, Suk Chio (Chonnam National Univ.)

11:20-11:40

Heavy Flavours and Heavy-Ion Collisions : Status and ALICE Perspectives, Federico Antinori (INFN padova & CERN)

11:40-12:00

Rcp Measurement with Hadron Decay Muons in Au+Au Collsion at 200GeV, Woojin Park (Korea Univ.)

12:00-12:20

Efforts towards ALICE at Yonsei, Youngil Kwon (Yonsei Univ.)

12:20-12:40

Chamonium states in the Quark Gluon Plasma, Kenji Morita (Yonsei Univ.)

12:40-13:00

ALICE seen by a student, B.-G. KIM (Yonsei Univ.)

13:00
