

Session Program

5 January 2021 to 5 March 2021

HIM archive 2004-10 - 2022-08

***HIM2018@Kangwon National
University(2018-05)***

Monday 18 January

09:00

HIM2018@Kangwon National University(2018-05)

Session

09:00-09:20 **Have we seen the QGP?, In-Kwon Yoo (Pusan Nat'l University)**

09:20-09:40 **Di-lepton flow in CMS, KiSoo Lee (Korea University)**

09:40-10:00

Production of strange particles in jets in p-p, p-Pb and Pb-Pb collisions measured with ALICE, Vit Kucera (Inha University)

10:00-10:20

Quarkonium measurement in pp, pPb, and PbPb collisions at 5.02 TeV with CMS, JaeBeom Park (Korea University)

10:20-10:40

Hottest results of open heavy flavor measurements (focused to nuclear modification factors), Hyunchul Kim (Chonnam Nat'l University)

10:40-11:00

Hadronic effects on Tcc abundance in relativistic heavy ion collisions, Juhee Hong (Yonsei University)

11:00
