

Advancing Entangled X-Ray Photon Research

Wednesday 15 October 2025 - Friday 17 October 2025

Book of Abstracts

Contents

Welcome & Introduction	1
Direct Observation of Two-Dimensional X-ray Biphoton Correlation in the Far Field . .	1
Accelerate Development of X-Ray Quantum Imaging by Ray Tracing Monte-Carlo Simulation	1
Badge available at the SCGP entrance	1
Moving Towards the Quantum Advantage	1
XPDC Overview	1
The Quantum Enhanced Telescope Project at NSLSII	1
Discussion - Collaboration and Funding	1
Nuclear quantum memory for hard X-ray photons	2
Towards Quantum Imaging at LCLS	2
Quantum Entangled X-ray Beams via HOM	2
X-ray Parametric Down Conversion at the SACLA XFEL	2
Entangled X-Ray Photon Pair Generation by Free-Electron Lasers	2
Towards Quantum Imaging at LCLS	2
Harnessing Ghost Imaging and Photon Entanglement: A Solution for High-Contrast, Low-Dose Imaging	2
X-ray FEL Oscillator: Characteristics and Development	3
Quantum Imaging with Positronium Decay Emitted Gammas	3
TEMPUS, an event-driven X-ray detector	3
Closing Remarks	3
X-ray parametric down-conversion reveals EUV-polariton	3
X-ray FEL Oscillator: Characteristics and Development	3
XFEL Characteristics and Prospects	3

5

Welcome & Introduction

6

Direct Observation of Two-Dimensional X-ray Biphoton Correlation in the Far Field

7

Accelerate Development of X-Ray Quantum Imaging by Ray Tracing Monte-Carlo Simulation

10

Badge available at the SCGP entrance

11

Moving Towards the Quantum Advantage

12

XPDC Overview

13

The Quantum Enhanced Telescope Project at NSLSII

14

Discussion - Collaboration and Funding

15

Nuclear quantum memory for hard X-ray photons

16

Towards Quantum Imaging at LCLS

17

Quantum Entangled X-ray Beams via HOM

35

X-ray Parametric Down Conversion at the SACLA XFEL

36

Entangled X-Ray Photon Pair Generation by Free-Electron Lasers

37

Towards Quantum Imaging at LCLS

38

Harnessing Ghost Imaging and Photon Entanglement: A Solution for High-Contrast, Low-Dose Imaging

39

X-ray FEL Oscillator: Characteristics and Development

40

Quantum Imaging with Positronium Decay Emitted Gammas

Author: Alayna SCHNEIDER^{None}

42

TEMPUS, an event-driven X-ray detector

43

Closing Remarks

44

X-ray parametric down-conversion reveals EUV-polariton

45

X-ray FEL Oscillator: Characteristics and Development

46

XFEL Characteristics and Prospects
