## An OPC UA Server for EPICS pvAccess

*Saturday 20 September 2025 16:10 (5 minutes)*

The proposed OPC UA server for EPICS pvAccess will enable EPICS-based systems to connect to a variety of external frameworks and tools. It will facilitate communication with not only SCADA frameworks but also any system with an OPC UA client, including HMIs, Remote Handling systems, and Virtual Reality tools, among others.

This session will feature a short demo showing:

- The gateway's web interface and some of its features
- An example of integration with an industrial SCADA
