Online or in person?

Tuesday 4 November 2025 18:00 (1h 30m)

We present results from our DEI surveys conducted in 2023 and 2024, focusing on whether workshops should be held online or in person. Surprisingly, we find no correlation between diversity criteria and a preference for online conferences, including care responsibilities. The only numerically significant predictors that lead scientists to prefer an online conference, as shown in new survey data from 2024, are VISA waiting times and lack of funding. Improved support for visa acquisition and funding can help improve the possibility of attendance.

Parallel Session (for talks only)

Theoretical developments and applications beyond Standard Model

Authors: CHAKRABORTY, Bipasha (University of Southampton); ROMERO LÓPEZ, Fernando (Uni Bern); STOKES, Finn (The University of Adelaide); RAYCHOWDHURY, Indrakshi (Department of Physics, BITS Pilani, KK Birla Goa Campus); MATHUR, Nilmani; MARTINS, Sofie (University of Graz); MENDES, Tereza (Universidade de São Paulo)

Presenter: MARTINS, Sofie (University of Graz)

Session Classification: Poster session
