Lattice QCD at finite temperature and density

Tuesday 4 November 2025 09:30 (45 minutes)

I will review the status of lattice QCD in extreme conditions—finite temperature, nonzero baryon chemical potential, and strong magnetic fields. Emphasis will be on the QCD phase structure and bulk thermodynamics.

Parallel Session (for talks only)

Plenary talk

Author: DING, Heng-Tong

Presenter: DING, Heng-Tong

Session Classification: Plenary session
