

Session Program

26-29 May 2026

Nordic-Baltic Astronomy Days 2026

26-B2: Planets

Radisson Blu Marina Palace Hotel
Linnankatu 32, 20100 Turku

Tuesday 26 May

14:45

26-B2: Planets

Session | Location: Room B

14:45-15:00

Constraining the interior characteristics of near-Earth asteroids with telescopic surveys, population models, space missions, and laboratory experiments

Speaker

Mikael Granvik

15:00-15:15

Observing the building blocks of the Solar System with the Nordic Optical Telescope

Speaker

Grigori Fedorets

15:15-15:30

Compositional properties of near-Earth binary asteroid (163693) Atira from Nordic observatories

Speaker

Eric MacLennan

15:30-15:45

Predictions for the Apophis 2029 Earth Close Approach from DEM Simulations

Speaker

Joseph DeMartini

15:45
