

Session Program

26-29 May 2026

Nordic-Baltic Astronomy Days 2026

Rapid (100 sec) Poster Talks

Radisson Blu Marina Palace Hotel
Linnankatu 32, 20100 Turku

Wednesday 27 May

12:00

Rapid (100 sec) Poster Talks

Session | Location: Room A+B

12:00-12:01 **Scanning strategy optimization for next generation CMB experiments**

Speaker

Synne Sigstad Jørgensen

12:01-12:02 **Blazar magnetic fields from launch to termination**

Speaker

Talvikki Hovatta

12:02-12:03 **Now you see me, now you don't: A new angle on black hole accretion**

Speaker

Marianne Vestergaard

12:03-12:04 **A Fast Framework for Robust Decomposition of Quasar Spectra**

Speaker

Liam de Búrca

12:04-12:05

Constraints on circumstellar matter in hydrogen-rich superluminous supernovae

Speaker

Tuomas Kangas

12:05-12:06

Late-time evolution of the interacting stripped-envelope supernova 2017dio

Speaker

Christina Humina

12:06-12:07

Non-Monotonic Effects of Earth-Departure Inclination in Low-Energy Lunar Transfer Optimisation using ESA MIDAS-SALTO for the Máni Mission

Speaker

Buyanbileg Amarsanaa

12:07-12:08

The C12/C13 ratio of cool giants as an evolutionary stage indicator

Speaker

Smaragda Vidali

12:08-12:09

Dust and ice in CONs IC 860 & NGC 4418: Diagnostics with JWST

Speaker

Gustav Olander

12:15
