

## **Session Program**

**26-29 May 2026**

## **Nordic-Baltic Astronomy Days 2026**

### ***Rapid (100 sec) Poster Talks***

Radisson Blu Marina Palace Hotel  
Linnankatu 32, 20100 Turku

# Thursday 28 May

12:00

## Rapid (100 sec) Poster Talks

Session | Location: Room A+B

### 12:00–12:01 Evolved Planetary Systems

**Speaker**

Alexander Mustill

### 12:01–12:02

### Multiple Populations in Globular Clusters: A manual re-analysis of APOGEE spectra

**Speaker**

Jess Kocher

### 12:02–12:03

### Near-infrared spectroscopic variability of post-AGB stars

**Speaker**

Karlis Pukitis

### 12:03–12:04

### Planet - Star correlations extended for 18 Hot Stars in the Ariel Mission Candidate Sample

**Speaker**

Heleri Ramler

### 12:04–12:05

### The history of C, N, and O in the Galaxy

**Speaker**

Šarūnas Mikolaitis

### 12:05–12:06

### High-Resolution Spectroscopy of Hot Subdwarfs with VUES: Benchmarking Gaia XP and LAMOST Classifications

**Speaker**

Vladas Šatas

### 12:06–12:07

### Detectability of deuterium in spectra of A-type stars

**Speaker**

Veronika Mitrokhina

### 12:07–12:08

### Measuring Solar Oscillations using High-Precision Temperature Variations from SONG Spectra

**Speaker**

Roar Holmberg

### 12:08–12:09

### Revisiting the [Y/Mg]-age relation with NLTE abundances and TESS asteroseismic ages

**Speaker**

Carlos Viscasillas Vázquez

12:09-12:10

**Propeller effect in action: Unveiling quenched accretion in the transient X-ray pulsar 4U 0115+63**

**Speaker**

Hua Xiao

12:15
