

Session Program

26-29 May 2026

Nordic-Baltic Astronomy Days 2026

28-B1: AGN

Radisson Blu Marina Palace Hotel
Linnankatu 32, 20100 Turku

Thursday 28 May

13:15

28-B1: AGN

Session | Location: Room B

13:15-13:30

The Astroparticle Physics European Consortium (APPEC) and the Astrophysics Centre for Multi-messenger studies in Europe (ACME)

Speaker

Antoine Kouchner

13:30-13:45

Are AGN jets emitting high-energy neutrinos?

Speaker

Pouya Kouch

13:45-14:00

Long-term optical variability of blazars

Speaker

Folkert Wierda

14:00-14:15

On the hunt for peaked source-like narrow-line Seyfert 1 galaxies

Speaker

Irene Varglund

14:15-14:30

Understanding the structure and variability of AGN

Speaker

Scott Hagen

14:30
