

Session Program

26-29 May 2026

Nordic-Baltic Astronomy Days 2026

28-C1: Stars

Radisson Blu Marina Palace Hotel
Linnankatu 32, 20100 Turku

Thursday 28 May

13:15

28-C1: Stars

Session | Location: Room C

13:15–13:30

Measuring Distances to Yellow Super- and Hypergiants in the Milky Way

Speaker

Anni Kasikov

13:30–13:45

Photometric and spectroscopic variability of the BSG rhoLeo

Speaker

Vitalii Checha

13:45–14:00

Infra-red Nebulae around Symbiotic Binaries

Speaker

Havva Bostan

14:00–14:15

Unveiling binary populations of hot subdwarfs with Gaia spectra and machine learning

Speaker

Markus Ambrosch

14:15–14:30

Time dependent synthetic observables of 3D models of AGB stars and dusty winds

Speaker

Joachim Wiegert

14:30
