

Session Program

26-29 May 2026

Nordic-Baltic Astronomy Days 2026

28-B2: AGN

Radisson Blu Marina Palace Hotel
Linnankatu 32, 20100 Turku

Thursday 28 May

15:00

28-B2: AGN

Session | Location: Room B

15:00–15:15

Shocks, polarisation, and high-energy emission: Probing black hole jets from VLBI to IXPE

Speaker

Georgios Filippou Paraschos

15:15–15:30

3C273 at the Highest Resolution

Speaker

Britton Jeter

15:30–15:45

Variable and non-variable blazars at very high energies; comparison of fractional variability and SED peak properties

Speaker

Emma Johtela

15:45–16:00

Cold gas feels the shove, not the heat: how the M-sigma relation emerges in multiphase bulges

Speaker

Matas Tárténas

16:00–16:15

Tracing the hot gas budget at the outskirts of galaxy groups with eROSITA

Speaker

Hossam Khalil

16:15
