

Session Program

26-29 May 2026

Nordic-Baltic Astronomy Days 2026

28-B3: Miscellaneous

Radisson Blu Marina Palace Hotel
Linnankatu 32, 20100 Turku

Thursday 28 May

16:45

28-B3: Miscellaneous

Session | Location: Room B

16:45-17:00 **Quasi-Normal Modes of Black Holes in EsGB Gravity**

Speaker

Håvard Skåli

17:00-17:15

The Escape Problem of Fast Radio Bursts: Strong Electromagnetic Waves and Fractals

Speaker

Mr Ethan van Woerkom

17:15-17:30 **Optical polarization of the neutron X-ray binary Sco X-1**

Speaker

Alejandra Diaz Teodori

17:30-17:45 **Detection of Ellerman Bombs in SST observations**

Speaker

Rebecca Nguyen

17:45-18:00 **Dynamical Sculpting of Planet Populations in Crowded Environments**

Speaker

Mika Kontiainen

18:00-18:15

Photometric modeling of the regolith in the Reiner Gamma and Mare Ingenii lunar swirls

Speaker

Vesa Björn

18:15
