## What is AI? Overview lecture: Part I

*Monday, 16 February 2026 12:30 (1h 30m)*

1) This lecture introduces what “AI” means today and how it relates to machine learning, with an emphasis on large language models (LLMs) and AI agents. We’ll build intuition for core ML ideas—supervised vs. self-supervised learning, loss functions, optimization, and generalization.

regression, classification, generation, language models, etc.

**Presenter:** HRADÍŠ, Michal (Brno University of Technology)
