

Networking to strengthen communication and public relations work in particle physics

Monday, 23 February 2026 17:50 (10 minutes)

The presentation provides an overview of the activities of the International Particle Physics Outreach Group (IPPOG) and the European Particle Physics Communication Network (EPPCN). It offers insights into the diverse outreach programs of various institutes and provides opportunities for networking and joint projects and activities between institutes in order to significantly increase the visibility of our current and future research topics among the general public.

Presenter: KRAMMER, Natascha (Austrian Academy of Sciences (AT))

Session Classification: Talks
