

2nd Workshop of the CPAN Network on Instrumentation and Detectors

Monday, 2 February 2026 - Wednesday, 4 February 2026

CIEMAT

Scientific Programme

The scientific programme of the CNID workshop brings together invited and contributed talks, on the topics listed below, covering the main detector and instrumentation R&D activities within CNID, with dedicated discussion sessions to encourage interaction and strategic alignment among participating groups.

WG1 Gaseous Detectors

WG2 Liquid Detectors

WG3 Solid State Detectors

WG4 Calorimetry

WG5 Quantum and superconducting sensors

WG6 Electronics

WG7 Mechanics and Integration

WG8 Applications

WG9 Scintillators and photodetectors

WG10 Characterization Techniques

WG11 Training

WG12 Low Background experiments
