## Estimators of stochastic flux variability

*Monday, 16 February 2026 12:15 (45 minutes)*

**Content:** the lecture will present the statistical tools observational astronomers are using to measure the stochastic variability of light curves, with emphasis on Active Galactic Nuclei. I will describe the benefits and shortcomings of different methods and also briefly discuss challenges associated with the Poisson nature of X-ray observations.

**Presenter:** Dr GEORGAKAKIS, A.
