ML project from scratch: lecture

Friday, 20 February 2026 09:30 (1h 30m)

Content: Participants will use skills from day 1 to train a custom deep network from start to finish using recommended tools and practices. Additionally, they learn about tools to observe training, managing ML models and results and how to optimize your model if performance is of issue. A laptop with internet access and a web browser is required!

Session Classification: PROMITY
