

Extension of the Mandate of Working Group WG14 on Particle Accelerators for Science and Technology

As recommended in the proposal for the rejuvenation of the Union, the 34th IUPAP General Assembly extended the mandate of Working Group WG14 on Particle Accelerators for Science and Technology until the 35th IUPAP General Assembly.

In recognition of the positive progress and achievements of WG14 over the past year, the 35th IUPAP General Assembly resolves to extend the mandate of the Working Group until the 36th IUPAP General Assembly, to be held in October 2027.

During this period, WG14 is encouraged to further develop its activities and consolidate its role within the Union. At the 36th IUPAP General Assembly, the future of the Working Group shall be reviewed, and a decision taken on whether to maintain it as a Working Group, transform it into a Standing Committee under an appropriate Commission, or discontinue its activities.
