

Session Program

29 September 2026 to 3 October 2026

HEASA 2026 (29 Sep - 02 Oct)

Other High-Energy Sources 1

Friday 2 October

10:30

Other High-Energy Sources 1

Session

10:30–11:00

Resonant Pacemakers — Heartthrob of Sgr A emission*

Speaker

Dr Jeandrew Brink

11:01–11:13

Modelling the Radio Flux Densities of Dwarf Novae Outbursts Detected by MeerKAT

Speaker

Keith McPherson

11:14–11:26

Search for Pulsed Emissions from V1223 Sagittarii in Fermi-LAT and TESS data

Speaker

Mr Erik Van Vuuren

11:27–11:39

The MeerKAT-South Pole Telescope 800 square degree Survey

Speaker

Prof. Roger Deane

11:40–11:52

Probing Magnetic Reconnection as a Mechanism for Recurrent GeV γ -Ray Emission in the Intermediate Polar V1674 Her

Speaker

Spencer Tendai Madzime

11:53–12:05

Magnetic Regulation and Energetic Stellar Feedback in Massive Galactic Star-Forming Regions

Speaker

PATRICK OKEZUONU

12:05
