eosc Node | EGI
Data, Computing & Digital

Mission: Deliver a Reference Compute & Data Exploitation platform in EOSC

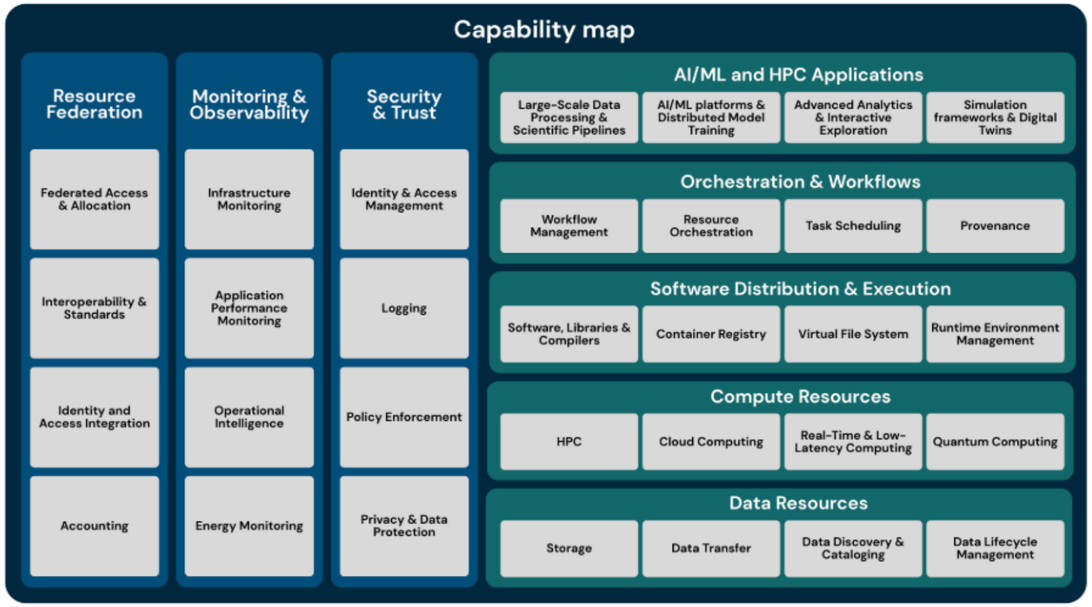

EGI Node

Data-intensive computing and research data exploitation

EGI Node Capabilities

Federating Capabilities

Resources & services

The EGI Node will deliver greater impact for EOSC and the European Research Area

More discoverable and reusable research

Easier access to data, services and resources across borders and disciplines.

Stronger collaboration

Connecting researchers, communities and infrastructures across Europe and beyond.

New use cases

From data-intensive computing to AI, machine learning, and cross-Node workflows.

A more resilient EOSC

Distributed, scalable and reliable infrastructure for long-term impact.

A stronger European Research Area

More open science, more innovation, more societal benefit.
