

Trusted environmental resources across disciplines

Atmosphere Hydrosphere Biosphere Solid Earth

PURPOSE AND OFFER

A thematic federation layer for authoritative data and services operated by Europe’s environmental Research Infrastructures.

Authoritative observations and derived products
Federated catalogue and semantic discovery
Common access, workflows and analysis environments
User support, training and onboarding

The Node connects resources. Each RI remains responsible for its data and services.

BENEFIT TO EOSC USERS

- ONE DISCOVERY ROUTE**
Find relevant environmental resources across four domains and infrastructures.
- TRUSTED SOURCES**
Use data with documented provenance, quality and a responsible scientific provider.
- CROSS-DOMAIN WORK**
Combine services and run workflows without learning every underlying infrastructure.
- FEDERATION REUSE**
Connect ENVRI capabilities with services offered by other EOSC Nodes.

BEHIND THE NODE

Coordinator	Technical coordination	Participating RIs
ACTRIS	IAGOS	ACTRIS · EPOS · ICOS · IAGOS · LifeWatch · SIOS · EIRENE

Operational support: EGI | Stakeholders: research communities, data providers, EOSC Nodes and policy users
