EOSC Node Latvia

Ilja Afanasjevs

Node Coordinator

EOSC Node | Latvia

A national, multidisciplinary gateway to the EOSC Federation

PURPOSE & RESOURCES

Connect Latvian research data, services and expertise to Europe.

Existing foundation
DataverseLV trusted data repository, academic network and federated identity, PURE research information, and university data stewards.

Planned services
Federated data discovery, FileSender transfers, Nextcloud file sharing, HPC access and an EOSC Competence Centre for support and training.

BENEFITS FOR FEDERATION USERS

Discover and reuse Latvian research data.
Share large files and collaborate across institutions.
Access computing and guidance on FAIR data through a common national gateway.

ORGANISATIONS & STAKEHOLDERS

We coordinates the Node with four Latvian research universities: LU, RTU, RSU and LBTU with support from Ministry of Education and science.

The gateway aims to serve 25+ research institutions, Latvian science foundation, their researchers and data stewards.

* Second-wave EOSC Node • Services under development
