EOSC | Federation

EOSC Node | METROFOOD-RI
Health & Food

Purpose of the Node and type of **resources** provided

- Infrastructure for promoting metrology in food and nutrition

Benefits that the Node will bring to the users of the EOSC Federation

- Access to trusted, FAIR food and nutrition data
- Specialised scientific tools, services and expertise
- Integration of food, health and agricultural data
- Cross-disciplinary research and collaboration
- Data interoperability and reuse across EOSC Nodes
- Support for AI-driven analysis and innovation
- Different tools for nodes such as catalogue, membership app, data quality service, software development

Who is behind the Node

- Claudia Zoani, ENEA, RI coordinator
- Nives Ogrinc, JSI, node coordinator
- Karl Presser, operations officer
- Kamil Kubala, cybersecurity officer
- Magdalena Pilch, communications officer
