EOSC Node | Türkiye

Turkish National EOSC Node

Bridging Türkiye's Open Science Efforts to EOSC to Benefit All

- Connecting Turkish national open science resources to EOSC network.
  - Enabling collaboration between Turkey and rest of the EOSC Federation users.
  - Bringing open science catalogues (Aperta & Harman) to the federation as a first step.
  - Helping other nodes and projects by providing compute and storage resources.
- New node will build a bridge between Turkish researchers and EOSC Federation users.
  - Creating a central entry point for Turkish researchers.
  - Increasing visibility and availability of Turkish research output and datasets.
  - Help accelerating international collaboration at EOSC Federation level.
- Node is currently staffed and operated by TUBITAK ULAKBIM
  - Acting as the NREN of the country, has close ties with universities and research community.
  - Is one of the institutions which helps shaping Open Science policy of country.
