

Jessica Parland-von Essen

Development Manager
CSC - IT Center for Science

Jessica Parland-von Essen has over 11 years of experience in leadership in digital transformation, IT service management, and competence development. Currently, she leads the piloting of the Finnish EOSC Finland Candidate Node, ensuring interoperability and alignment with sustainability goals. Jessica's expertise spans strategic planning, stakeholder engagement, and process digitalization, with a strong focus on Open Science, FAIR data principles, and user-centric solutions. She holds a PhD in History and a degree in Information Management. Jessica has been active in the FAIRsFAIR and FAIR-IMPACT projects, the national Open Science and Research Initiative, and led digital archiving projects. She has also been active in developing national over-arching reference architecture work for Open Science and Research Data Management.
