

Pasquale Pagano

Senior Researcher
Italian National Research Council
European DTO EOSC Node

Pasquale Pagano is a Senior Researcher at the National Research Council of Italy's Institute of Information Science and Technologies (CNR-ISTI), where he leads the development of D4Science, an e-infrastructure supporting collaborative Open Science across multiple research domains. He coordinates the European DTO Node, the thematic EOSC Node for marine and aquatic research recently established within the EOSC Federation, and the EOSC-Marine project that operationalises it as the Open Science component of the European Digital Twin of the Ocean (EDITO). He previously served as Scientific Coordinator of Blue-Cloud2026 and as Infrastructure Manager of the SoBigData Research Infrastructure. With over two decades of experience in distributed data infrastructures, Virtual Research Environments and FAIR data management, his work focuses on bridging Open Science communities with operational digital infrastructures across Europe
