

Alessandro Petrocelli

Chief Technology Officer, Trust-IT
Services and COMMpla Srl
Technical Architect, EUDAT EOSC
Node

Alessandro Petrocelli is Chief Technology Officer at Trust-IT Services and COMMpla Srl, and Technical Architect at EUDAT. A full-stack software engineer with over 20 years in research and innovation projects, he oversees the full software production lifecycle, from design and development to maintenance and evolution. His approach starts from the user perspective: working closely with both commercial and research clients to interpret the real challenge before moving into technical design. His expertise spans software integration, containerisation and orchestration, and large-scale cloud environments. At EUDAT he focuses on the technical architecture of the EUDAT Node and its integration within the EOSC Federation.
