

Thanassis Karmas

Chief Architect & Operations Lead
Athena Research Center
EOSC EU Node

Thanassis Karmas is the Lead Architect of the Core Services of the EOSC EU Node from the Athena Research Center. With a background in Electrical and Computer Engineering and a Master's in Geoinformatics, his work centers on the design and deployment of large-scale data-driven infrastructures and services. He has extensive experience in full-stack software development and systems administration, including mission-critical environments such as the banking sector. At Athena Research Center, he has led the architectural design and technical coordination of digital research infrastructures, most notably EOSC EU Node and EBRAINS both flagship infrastructures in supporting Open Science.
