

Arian Artman

Simpl Contractor, NTT Data

Arian Artman is a Data Space and Digital Sovereignty expert, and one of the IDSA Ambassadors specializing in trusted and sovereign data-sharing ecosystems. He has contributed to the International Data Spaces Association (IDSA), the Gaia-X Technical Committee, and the definition of technical specifications for the Gaia-X Federated Services (GXFS). Over the years, he has played a leading architectural role in several European Data Space initiatives, helping translate strategic visions for data sovereignty into practical, interoperable solutions. His work focuses on enabling organizations to participate securely in cross-organizational data ecosystems while advancing European approaches to digital sovereignty, interoperability, and trusted data exchange.
