

Juan

González García

Head of Health Data Strategy &
Biocomputing Unit Manager
Aragones Institute of Health Science
(IACS)

Juan González García, PhD, leads Biocomputing and the strategy to maximise the value of health data at the Aragon Health Sciences Institute (IACS). As a data scientist, he promotes the secure, interoperable secondary use of health data to support research and evidence-based decision-making. He is Co-Chair of the EOSC-A Health Data Task Force and has led IACS contributions to initiatives related to the European Health Data Space, including TEHDAS Joint Action, SHAIPEP, EHDS2Pilot, as well as serving as principal investigator for HealthyCloud. His work bridges health research, digital infrastructure and public-sector innovation, helping transform complex health datasets into trustworthy, reusable resources for European research and innovation.
