

Justin Ansotte

Engineering & AI Team Lead
Belgian Health Data Agency

Justin Ansotte is a computer science engineer working as the lead of the engineering and artificial intelligence team at the Belgian Health Data Agency. His work focuses on the design, development, and implementation of the Digital Business Capabilities for the secondary use of health data in the European Health Data Space. These include among others: the metadata infrastructure, from ingestion to publication on the national health data catalogue, the management of data requests and data access applications and the Secure Processing Environment. He is also a contributor to European projects on the EHDS such as TEHDAS2, SHAIPEd and FORTIFY.
