

Karl Presser

Managing Partner

Premotec GmbH

Dr Karl Presser is the founder and managing partner of Premotec GmbH and Premotec Poland sp. z o.o. He trained as a computer scientist and his research interests are in global information systems, data quality, and data infrastructures. He worked at ETH Zurich as senior scientist and continued this work with his own organisations. Karl is the primary creator of FoodCASE, a tool to manage and generate food data, where some research work is incorporated. With more than 15 years of experience in food data, Karl contributed to different European and international standards and recommendations in managing and exchanging food data. His current work is focusing on European research infrastructures and European Open Science Clouds (EOSC).
