

Marcus Povey

Senior Software Developer Lead
Instruct-ERIC

Marcus Povey is the IT lead at Instruct-ERIC, the European Research Infrastructure Consortium for structural biology. He leads ARIA, Instruct's cloud platform for research access and data management, and works on its integration into the EOSC federation, including DCAT-based metadata mapping and semantic interoperability across national and pan-European services. Marcus contributes to several Horizon Europe projects, including Fragment-Screen and ACCESS2ACCESS, and to EOSC United's work on service and resource product catalogues. His background spans software engineering and research infrastructure operations, with a particular focus on making FAIR data practical for structural biology, from identifier resolution to federated storage and open catalogue design.
