

Erik Schultes

Scientific Director
Partners in FAIR

Erik Schultes is scientific director at partners in FAIR and a co-author of the FAIR Guiding Principles. Erik has focused on FAIR implementation infrastructure, including the first FAIR maturity evaluation service, the FAIR Implementation Profile now driving convergence across domains, the Three-Point FAIRification Framework, and the first accredited FAIR training programmes. He co-chairs the FAIR Digital Object Forum and is Editor-in-Chief of FAIR Connect. His current work deploys FAIR Digital Objects as a governance layer for trusted AI, enabling provenance and auditability in mission-critical applications. Previously Implementation Lead at the GO FAIR Foundation and Senior Researcher at Leiden University's Metabolomics and Analytics Centre.
