

Stefano Cozzini

Director of the Institute for
Research and Innovative
Technologies (RIT)
Area Science Park

Dr. Stefano Cozzini is Director of the Institute for Research and Innovative Technologies (RIT) at Area Science Park, Trieste, where he leads a team of over 80 people running research infrastructures in genomics and epigenomics, data engineering and HPC/AI (ORFEOdata center), and electron microscopy, providing advanced scientific services to academia and industry. He was scientific coordinator of the PNRR-funded PRP@CERIC project and of Area Science Park's activities in NFFA-DI. For both projects he designed the overall digital infrastructures. His research focuses on scientific data management, FAIR data and the intersection of HPC and AI.
