

Pavel Weber

Systems Engineer and Team Lead
Karlsruhe Institute of Technology
(KIT)

Pavel Weber is a systems engineer and team lead at the Karlsruhe Institute of Technology (KIT), Scientific Computing Center (SCC). His background combines systems engineering and the integration of distributed systems, with a focus on delivering helpdesk and collaborative services to research communities. For many years he has been developing and operating helpdesk systems for the Worldwide LHC Computing Grid (WLCG) and for EU-funded projects including EOSC-hub, EOSC Future and EOSC Beyond.
