

Martin Golasowski

Senior researcher
IT4 Innovations National
Supercomputing Center, VŠB–
Technical University of Ostrava

Martin Golasowski, Ph.D., is a Senior Researcher at IT4Innovations National Supercomputing Center, VŠB–Technical University of Ostrava, specializing in distributed data management and workflow orchestration across HPC and cloud infrastructures. He has contributed to major European initiatives including the LUMI AI Factory, EOSC CZ, OpenWebSearch.eu, LEXIS and EXA4MIND projects. His research interests span HPC–cloud convergence, large-scale data infrastructures, workflow orchestration, and scalable data management for scientific and AI applications.
