

Roxanne Wyns

Director, EOSC Association
Innovation Manager, LIBIS (KU
Leuven)

Roxanne Wyns is Innovation Manager at LIBIS, a digital service provider that is part of KU Leuven. She has more than 15 years of professional experience managing complex and large-scale digital infrastructure projects in Research Data Management and Open Science as part of LIBIS.

Roxanne currently acts as co-promoter of several research infrastructure projects in collaboration with KU Leuven research groups and is director of iCANDID, a KU Leuven Core Facility for the Interdisciplinary Aggregation and FAIR access to (Big) Data Collections. She regularly coordinates work packages for Horizon projects, where she contributes her expertise on data modelling and interoperability and is involved in EOSC EDEN, a project that is tackling the challenges related to long-term data retention and preservation, building on the work of the EOSC-A Long Term Data Preservation Task Force (2021-2023) for which she acted as co-chair.

eosC Symposium 2026

At KU Leuven, Roxanne continues to support university-wide and cross-domain initiatives for Open Science and FAIR data principles. She also resides in the Cross-Domain Interoperability Framework (CDIF) Advisory Board and has joined the EOSC-Association Board of Directors in January 2025.
