

Jan Krasni

Researcher, Technische Universität
Berlin

Project Lead, ERIHAD.OS

Dr. Jan Krasni is a researcher at the Center for Research on Antisemitism (ZfA) at Technische Universität Berlin and Project Lead of ERIHAD.OS, an OSCARS-funded initiative developing ethical and technical approaches for research infrastructures dealing with sensitive, hateful and discriminatory data. His work focuses on research data infrastructures, Open Science, AI ethics, digital governance, antisemitism and discrimination research, and the challenges of applying FAIR principles to sensitive historical collections. He is particularly interested in trusted research environments, sovereign Compute-to-Data approaches, responsible access models, and the governance of research data that cannot simply be made openly available. Jan also works on European research infrastructure projects and collaborations connecting humanities research, digital infrastructures and emerging AI-based methods.
