

Rafał Bartczuk

Behavioral Scientist
Children's Memorial Health
Institute

Rafał P. Bartczuk, PhD, is a behavioral scientist at the Children's Memorial Health Institute in Warsaw, where he leads the Paediatric Regional Centre for Digital Medicine. His work focuses on secondary use of health data, federated research infrastructures, interoperability, real-world data and responsible AI in paediatric research. He is actively involved in EPTRI – the European Paediatric Transnational Research Infrastructure – and, representing EPTRI, is a member of the EOSC Health Data Task Force. He also contributes to European initiatives including DARWIN EU, PHDS, and other projects developing federated approaches to paediatric health data. His current work focuses on connecting paediatric research infrastructures with European data ecosystems and enabling secure, FAIR and cross-border reuse of sensitive health data.
